Also reminded to oughs and sneezes in tissues – Catch it, Bin it, Kill it and to ouching face, eyes, nose or with unclean hands. Tissues made available throughout
				disinf that a partic such a switch	rently cleaning and recting objects and surfaces are touched regularly cularly in areas of high use as door handles, light hes, washing machine and le dyer					coronav everyon Posters,	reduce the spread of virus (COVID-19) reminding the of the public health advice - leaflets and other materials lable for display.

		Social Distancing Social Distancing -Reducing the number of persons in any area to comply with the 2-metre (6.5 foot) gap recommended by the Public Health Agency Only one member allowed in the facility at any one time.		Rigorous checks will be carried out by Committee Officers to ensure that the necessary procedures are being followed.  Members to be frequently reminded of the importance of social distancing. Committee Officers to undertake regular checks to ensure this is adhered to.
		Wearing of Gloves Where Risk Assessment identifies wearing of gloves as a requirement, an adequate supply of these if available will be provided. Members will be instructed on how to remove gloves carefully to reduce contamination and how to dispose of them safely.		Members to be reminded that wearing of gloves is not a substitute for good hand washing

## RISK ASSESSMENT GUIDANCE

Hazard Identification						
When undertaking a risk assessment consider the following hazards (this list is not exhaustive and other hazards may be present						
Acid	Falling / flying objects	Other people				
Adverse weather	Falls from height	Physiological Capabilities (Human Factors)				
Asphyxiation / drowning	Ground collapse / failure	Pressure systems				
Chemicals / harmful substances	Heat / fire / explosion	Psychological Capabilities (Human Factors)				
Confined spaces	High / low temperature	Structural failure				
Contact with moving parts / machinery	Human Behaviour	Underground / overhead services				
Dust / fumes	Inadequate Lighting	Uneven ground				
Electricity	Lone Working	Unsafe access / egress				
Explosion	Machines / objects overturning	Use of power tools				
Failure of lifting equipment	Manual handling	Vehicle movements				
Failure of tools / equipment	Noise	Vibration exposure				

Persons at Risk						
All	Members	Young Persons	Contractors	Visitors	Member of Public	

	RA - Form Guidance
(1) Hazard Identification	Put in all the potential hazards associated with the task (Consider hazard list above).
(2) Associated Risk(3) Current Controls	Put in the likely effects i.e. cuts, burns, broken limbs, damage to property.
(3) Current Controls	Put in the existing controls i.e. SWP, procedures, Guards, demarcation, PPE.
(4) Severity of Harm	Estimate the severity (Scale 1 to 5 see severity indicator).
(5) Likelihood of Occurrence	Estimate the likelihood (Scale 1 to 5 see likelihood indicator).
(6) Risk Rating	Multiply the severity of harm score with the likelihood of occurrence score.
(7) Further controls necessary	State if further controls are required to control / reduce the risk. Complete action plan

Severity					
Minor injury no lost time					
Minor Lost time Injury under 7 days					
Serious lost time injury over 7 days					
Major Injury (Specified Major under RIDDOR)					
Fatality					
Likelihood					
Rare (may occur only in exceptional circumstances)					
Unlikely (may occur sometime)					
Possible (should occur at sometime)					
Likely (event will probably occur in most circumstances)					

Almost certain (event is expected to occur in most circumstances)

Risk rating					
High 15 to 25	UNACCEPTABLE RISK - Stop the task or do not allow it to start until further controls have been implemented in order to reduce the risk as low as is reasonably practicable (a balance of cost and risk) and ideally to achieve a low risk rating.				
Medium 7 to 14	RISK MAY BE UNACCEPTABLE - It may be acceptable to implement temporary control measures to achieve the required level of risk reduction until more permanent measures are in place.				
Low 1 to 6	ACCEPTABLE RISK - Task may continue presuming controls are implemented and monitored.  Where additional low or no cost control measures can be implemented, particularly where this encourages employee engagement, these should be considered.				

Hierarchy of Control				
<b>E</b> liminate	Get rid of the hazard; replace it with something less hazardous.			
Reduce	Reduce the level of risk by reducing the nature of the hazard, e.g. use small quantities, lower voltage etc			
<b>I</b> solate	Isolate the hazard from people, for example by guarding			
Control	Control exposure to the hazard by controlling who has access or limiting exposure time			
<b>P</b> PE	Personnel Protective Equipment			
<b>D</b> iscipline	Training and Supervision
